Profile

Software Engineer specializing in the React ecosystem (Next.js, TypeScript) with a strong foundation in backend technologies (NestJS, Node.js). Proven track record of building high-performance platforms serving over 200,000+ users globally. Experienced in migrating legacy systems to modern architectures and managing end-to-end development cycles from UI implementation to CI/CD deployment.

Professional Experience

Software Engineer   08/2023 – 12/2025
VireUp 🔗   UK (Remote)

- Developed a high-performance online interview platform serving **200,000+ candidates** worldwide for major clients like **Turkish Airlines** and **Mercedes**.
- Engineered a scalable frontend infrastructure using **Next.js and TypeScript**, migrating a legacy codebase while ensuring zero downtime.
- Built robust backend services using **NestJS and GraphQL (Apollo)**, implementing a secure authentication system with Refresh Token Rotation.
- Established comprehensive testing environments with **Jest and Playwright**, and automated workflows via CI/CD pipelines.

Frontend Developer   12/2022 – 08/2023
Any Game Labs   Denizli/Turkey

- Architected and built the frontend of a new NFT marketplace from scratch to support the company's Web3 gaming ecosystem.
- Integrated blockchain functionalities and wallet connections, ensuring a seamless user experience for crypto-asset transactions.
- Collaborated closely with backend teams to optimize API data consumption and improve page load speeds.

Frontend Developer Intern   06/2022 – 08/2022
Jotform   Istanbul/Turkey

- Played a key role in re-architecting the "Jotform Inbox" feature within a large-scale codebase used by millions.
- **Leadership:** Acted as the project lead for a 5-person intern team; coordinated the integration of UI designs with backend logic and ensured successful delivery.

Education

B.Sc. in Computer Engineering   06/2020 – 07/2024
Pamukkale University   Denizli/Turkey
