Summary

- Frontend Developer with 3 years of experience using **React** with **NextJS**. Can build scalable frontends with type safe codebase using **TypeScript.** Creates reusable and testable components and have deep knowledge of React and its render systems to provide fast and reliable user interfaces.

Experience

VireUp   **Aug 2023 - Present**
Software Engineer   London, UK - Remote
🔗 https://www.vireup.com

Migrated a legacy codebase into a modern, scalable, secure, and testable architecture — all while keeping the existing systems actively running. Built a Next.js + NestJS infrastructure that includes:

- A robust authentication system with Refresh Token Rotation, built from scratch

- GraphQL API using Apollo Client for efficient data transfer

- A reusable design system aligned with company branding

- Comprehensive testing setup with Jest for unit tests and Playwright for end-to-end testing

- CI/CD pipelines for automated testing, linting, building, and deployment

  Delivered a seamless online interview experience for over **200,000 candidates worldwide**, serving B2B clients such as **Turkish Airlines, Mercedes, Domino's, and MediaMarkt**.

Any Game Labs   **Dec 2022 - Aug 2023**
Frontend Developer   Denizli / Turkey

Designed and built the frontend architecture from scratch for a new NFT marketplace, integrating blockchain functionalities to support the company's web3 games.

Jotform   **Jun 2022 - Aug 2022**
Frontend Developer Intern   Istanbul, Turkey
🔗 https://www.jotform.com

- Played a key role in re-architecting and developing the new Jotform message box feature from the ground up within a major, large-scale codebase.

- Acted as the project lead for a 5-person intern team; coordinated the integration of UI designs and backend logic, ensuring seamless teamwork and successful project delivery.

Education

PAMUKKALE UNIVERSITY   **June 2020 - July 2024**
COMPUTER ENGINEERING   Bachelor of Science
